PIANOS IN THE DIGITAL AGE

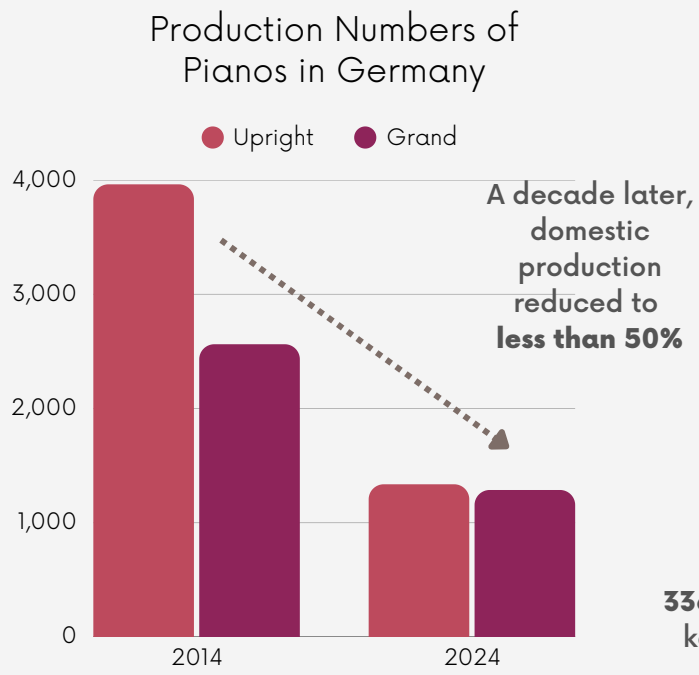
MARKET ANALYSIS OF GERMANY'S PIANO INDUSTRY

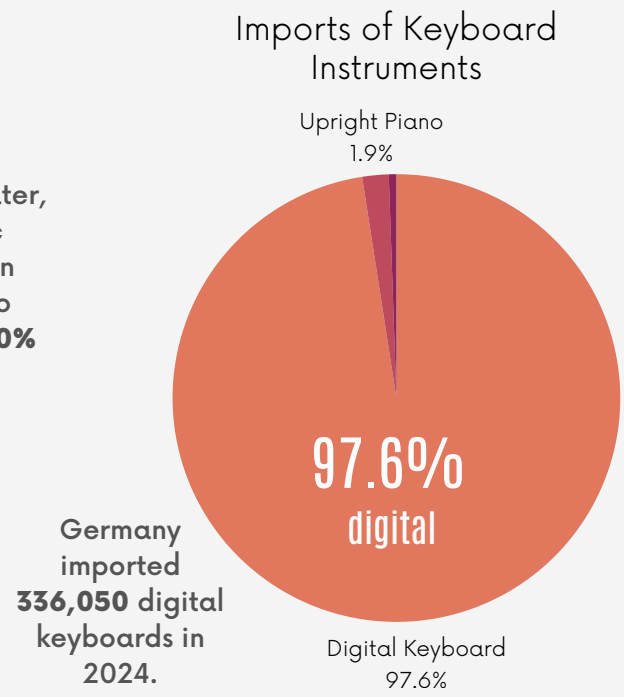
CONTEXT

Germany is renowned worldwide for producing premium acoustic pianos. How has the acoustic piano market been affected by the rising popularity of digital keyboards?

OVERVIEW

A quick look at the 2024 piano market in Germany:





Germany imported **336,050** digital keyboards in 2024.

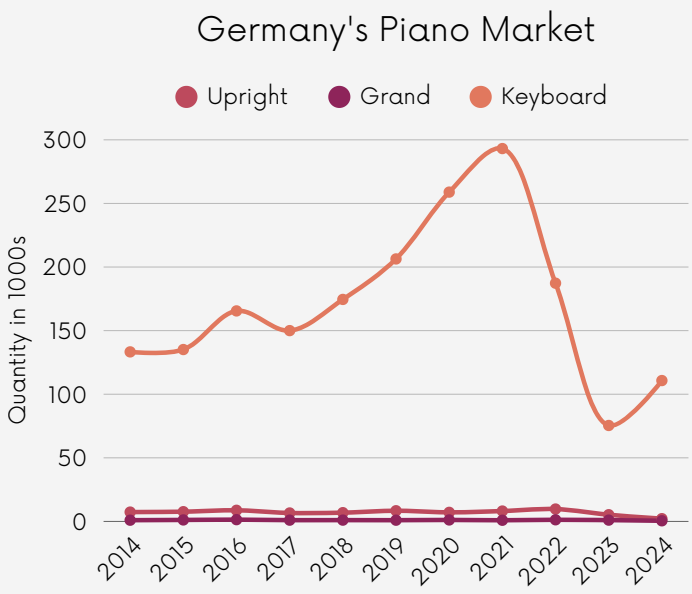
DOMESTIC DEMAND

Rise and Fall of the Digital Keyboard:

Domestic demand (net import + production) for digital keyboards dominates the market, but falls dramatically after peaking during the **pandemic.**

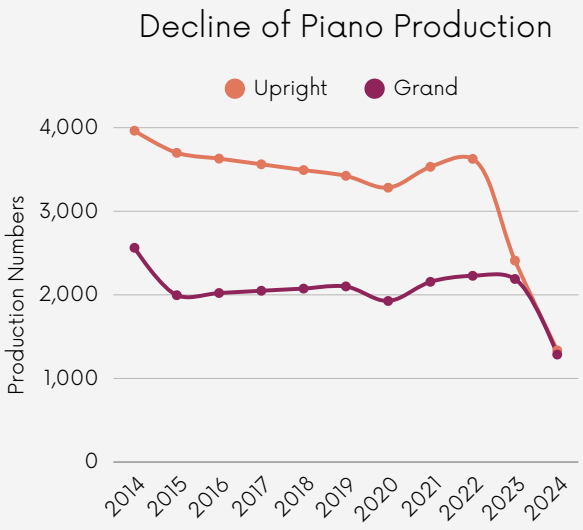
Affordability: €€€€€€

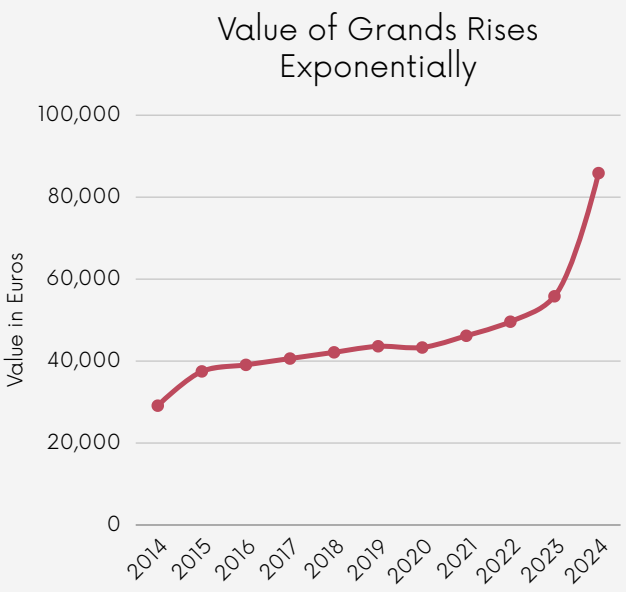
At **1/6** the price of the comparable upright piano, digital keyboards are significantly more affordable.



IMPACT ON PRODUCTION

In contrast, domestic production has been decreasing, with a significant drop in the last two years.





Piano manufacturers turn their focus to the high-end market: in 2024, an average grand piano values at over **80,000** Euros!

Germany exports **1.4x** more grand pianos than it imports, indicating strength in manufacturing and exports.

KEY TAKEAWAYS

- Digital keyboards dominate the market as the most affordable option for consumers.
- Piano manufactures turn to quality over quantity: acoustic pianos become high-end premium products.
